## THE CORRECT GRIP

**FUNNIER** 🦉 **FASTER** 🦉 **EASIER**

***GripFixer information.***

---

Experience shows that beginners use the wrong grip when they start playing badminton - both children, youngsters, and adults. It is difficult to learn the correct grip - very difficult.

GripFixer is a small and light teaching aid, which can quickly and easily be mounted on the racket.

GripFixer is a completely new product, which helps players to hold both forehand- grip and backhandgrip - by guiding the placement of the fingers. At the same time it feels uncomfortable to hold incorrectly.

### **Funnier experience**

For most people there is a joy associated with knowing that they are doing it correctly - with GripFixer they know that they are holding the racket correctly.

### **Learn it correctly from the start**

Give your child the best opportunities in the future - so the child can enjoy the game even more.

### **Frees up some of the coaches resources**

The correct grip is very essential, but now the coach can focus on other things - e.g. making the practice even funnier.
